

Group Members:

Yao Zheng Zhang: He created the face tracking program for the phase 3 final project.

Qiyue Zhang: He created the smile model, previous qr code and markers

Beining Yang: She did the writing for some docs and website

Yuying Li: She did the writing for some documentation

AR content:

The content of this project is a Face-Tracking program that can be interacted with a button to project a Smile model onto the user's face.

The Smile model is a simple model that contains a smile.

The expected experience for this project is "wow there is a smile on my face, this is so sad".
